

Technologies provide greater opportunities to transform and modernize municipalities. Alentejo region can realize their full potential with strategy and structure process. With **SmartPortals**, Alentejo gathers all the conditions to promote the region, economy, social services, employment, resources to transform opportunities into reality.

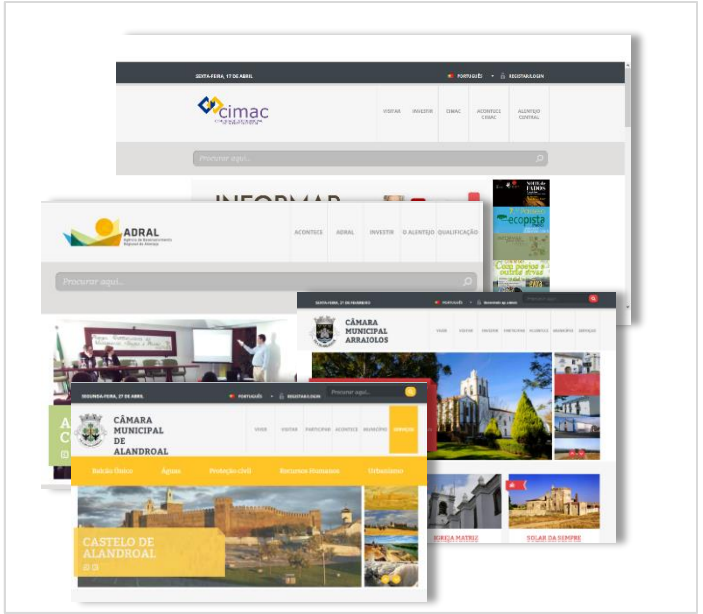

### Category

Government Admin Portal

### Technology

Microsoft

### Client

Comunidade Intermunicipal do Alentejo Central (CIMAC) e Adral

COMUNIDADE INTERMUNICIPAL DO ALENTEJO CENTRAL

ADRAL  
Agência de Desenvolvimento Regional do Alentejo

### The Challenge

Promote the planning and management of economic, social and environmental development of Alentejo territory, joint municipal investments of inter-municipal interest, regional development programs participation (particularly under the National Strategic Reference – NSRF), and planning public authorities' actions of supra municipality nature.

### The Solution

**SmartPortals** is an aggregation solution that supports multiple independent portals. Each portal has its own domain name and look & feel. Provides a common set of functional components that are used across all portals: sharing and importing content, search-based solution, location-based content filtering, interactive maps, advance image edition.
