

The **SmartPortals** provides opportunities to transform and modernize companies and organizations, connecting people and institutions in order to create innovation opportunities, to promote services, business and information.

Modernize society, social and economic relations

Innovate to generate efficiency and effective solutions

## The Solution

**SmartPortals** is a integrated solution that supports multiple independent or interconnected portals. Each portal has its own domain name and look & feel. Provides a common set of functional components with flexible features: sharing and importing content, search applications, location-based content filtering, interactive maps, advance image edition.

## The Challenge

How to connect and promote innovation between business, services and users?

How to create opportunities to improve society and business?

How to optimize resources in multiple scenarios?

Microsoft Technology
